FullStack Developer

I am a highly skilled and versatile Full-Stack Developer with a robust background in building scalable, secure, and user-centric web applications. My expertise spans the entire development lifecycle, from dynamic front-end interfaces using React and Next.js to high-performing back-end systems with Node.js, Express, and Django, with a passion for problem-solving and a track record of delivering complex projects, I am committed to crafting innovative solutions that drive success and elevate user experience.

WORK EXPERIENCE

Livepetal • Nigeria   01/2025 - 09/2025

Livepetal is a dynamic and innovative technology company focused on building scalable digital solutions that enhance business operations and customer experiences.

FullStack Developer • Full-time

- Responsible for designing, developing, and deploying end-to-end web applications.
- Built responsive user interfaces using React.js, Next.js, and TailwindCSS, developed RESTful APIs and server-side logic with Node.js, and Express.
- Mentored junior developers and in charge of training programs for software development students.

Mental maze • Remote   02/2024 - 07/2024

Frontend Engineer • Full-time

- Implemented responsive design to improve website loading , resulting in enhanced user experience and higher conversion rates.
- Improved code optimization and correction of inefficient processes, resulting in a smoother user experience and increased customer satisfaction.

LuTA • Delaware, United States(Remote)   02/2023 - 01/2024

Code Contributor

- Actively participate in the development lifecycle, engaging in collaborative coding sessions, conducting code reviews, and contributing to the design and implementation of scalable software solutions.
- I've championed the adoption of new tools and technologies, leveraging my curiosity and passion for learning to stay abreast of industry advancements.
- I've played a pivotal role in identifying and addressing potential risks or bottlenecks within the codebase

SKILLS

- React
- Next.js
- Javascript
- Python
- Django REST Framework
- Postman
- Git

EDUCATION

Bachelor of Technology - B.Tech in Meterology

Federal University of Technology Akure
01/2016 - 09/2021

IvyArc Africa • **Lagos, Nigeria**   **11/2020 - 02/2021**
Software Engineer Intern
- Collaborated with teams to gather requirements, designed the solution, and successfully delivered the feature within the specified timeline.
- Showcased my ability to contribute meaningfully to a real-world project, demonstrating both technical proficiency and teamwork in a dynamic software engineering environment

CERTIFICATIONS
